

## Calgary Police Cybercrime Education Officer Presentations

### **Parent/Caregiver Information Session**

- In this talk I try to give an understanding of most of the current concerns for individual users, police services, governments and businesses.
- Origins of the internet and how its current design can be a concern for police, governments and individual users
- Information on “the deep web” and how that is impacting law enforcement
- The permanency of the internet and the concept of digital citizenship
- The importance being involved and helping shape your child’s internet experience
- The importance of having a respectable internet footprint
- The dangers of having your devices infected by malware
- How online predators target children and other risks associated with social media
- Offensive material online
- The prevalence of identity theft
- Importance of strong passwords
- The phenomena of cyberbullying
- Gaming pitfalls
- Calgary Police Service resources dedicated to these issues
- Helpful tips and links for further education, time for questions

### **Youth Information Sessions (4,5,6 - softer message) - (7,8,9 - more real world)**

For youth the messaging is more selective and censored but still touches on all the main points.

- For youth the message is more selective and censored but still touches on all the main points.
- How online predators target us and other risks associated with social media
- The dangers of having your devices infected by malware
- Offensive material online
- The prevalence of identity theft
- Importance of strong passwords
- Gaming pitfalls
- Calgary Police Service resources dedicated to these issues
- Helpful tips and links for further education, time for questions

### **Business Information Session**

- An overview of Calgary Police Service’s response
- Gateways of vulnerability – malware vectors
- Dark web markets
- Approaches to company social media presence
- Countermeasures to employ to target harden
- Data protection

- Device management
- Physical security
- Personal Information Protection Act
- Resources

**Audio-Visual Requirements – Ideally, I would need a PC, projector/screen and speakers for the audio portions. If the room is particularly large (50 people plus) a microphone may be needed.**
